

Installation Engineer

Location - Nationwide

An exciting opportunity to join a market leader in the Commercial Vehicle Safety & Security industry, trading for almost 40 years. We design, manufacture, supply and install a diverse range of products, operating across multiple markets both in the UK and internationally.

As a mobile Engineer you will be required to install and service commercial vehicle security and safety products. You will be involved with installation of the commercial vehicle systems such as electrical, pneumatic and air services. The products you will be involved in fitting will be high security locks, insurance specification alarm systems, air operated locks, air brake immobilisation devices, reversing cameras, CCTV systems etc. You will mainly work alone but also as part of a team on some occasions. You will be trained on our product range and you will also be required to complete formal qualifications through the MESF personal progression scheme. You will be issued with a company van, a Toughbook laptop and a smart phone to assist you in your duties.

We offer a competitive salary for the right person along with company pension, graded salary for productive/efficient Engineers, standby payment if on call, fixed payment if called out, childcare tax credit scheme and an employee perk-box scheme.

If you would like to apply for the position please contact terry.orton@maplefleetservices.co.uk or dayle.lusty@maplefleetservices.co.uk
