Redefining Van Security

BondLock is Maple's innovative, high-security van locking system—designed and engineered to deliver maximum protection against both physical attack and keyless theft techniques that bypass manufacturers security.

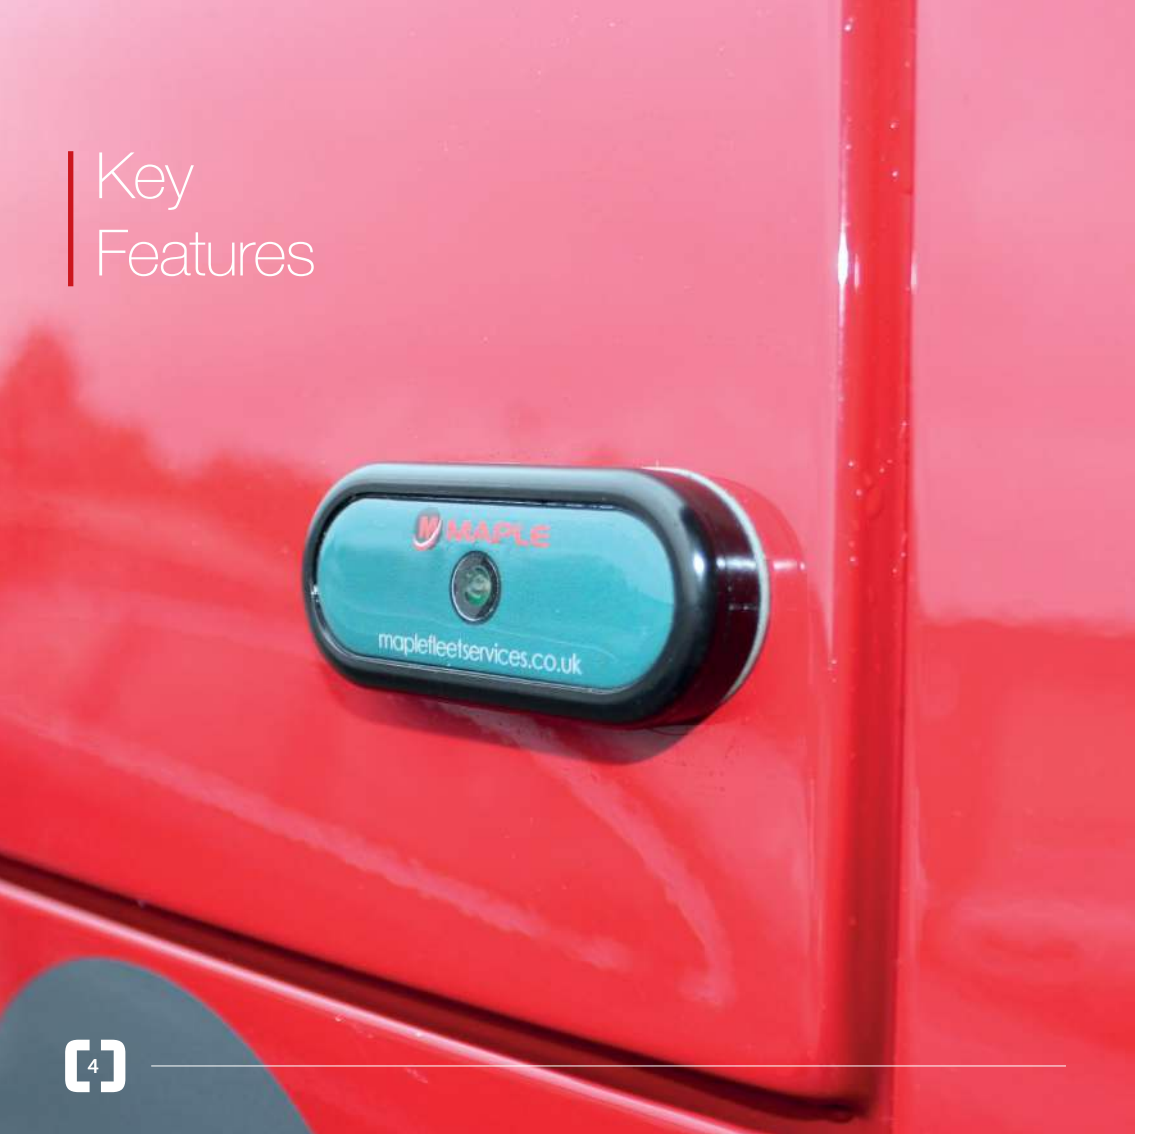
Van owners and fleet operators are facing unprecedented levels of crime. Today's career criminal has access to an arsenal of different weapons and tools that can be used to bypass manufacturers central locking and security.

With so many different theft techniques to guard against, protecting your vehicle can be a real challenge. BondLock is the solution.

Its unique, patented design has been extensively tested under attack conditions, ensuring it meets the demands of today's van operators.

BondLock – Securing Your Van. Protecting Your Business.

Key Features



BondLock is engineered to tackle the real-world challenges faced by van operators, combining robust security with a wide range of fleet management advantages.

PREMIUM SLAMLOCK
Innovative, high security, automatic setting lock that elevates the security of your van, delivering total peace of mind.

COMBATS MODERN THEFT TECHNIQUES
Engineered to resist today's most common methods of attack and proven to endure prolonged assault under attack test conditions.

COMPATABILITY
Suitable for use on side sliding doors, barndoors and tailgate applications.

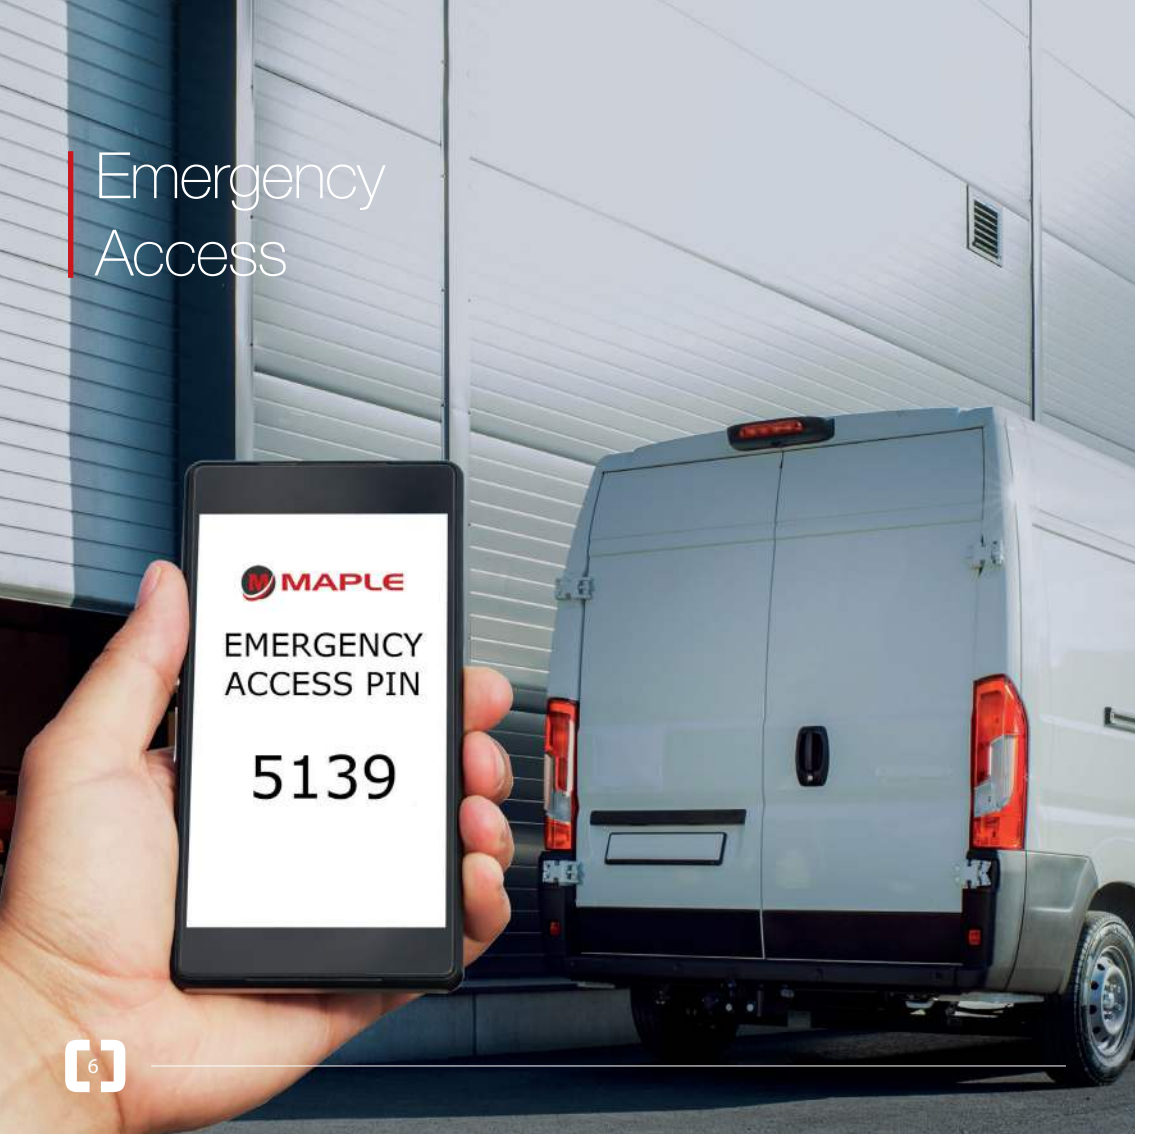
INTERNAL MOUNTING
Securely mounted inside the load area to provide maximum protection from attack and tampering.

2 TONNE TENSILE STRENGTH
Patented lock mechanism withstands tensile load exceeding 2 tonnes, delivering unparalleled durability and protection.

INDEPENDENT CONTROL
Operated independently from the manufacturers central locking using RFID transponders. Lost fobs can be quickly replaced with the originals decommissioned to maintain security.

INTERNAL RELEASE
Discreet, internal release mechanism enables exit from inside the load area.

LOW MAINTENANCE
Features a self-adjusting lock mechanism to compensate for door movement, providing a lifetime of reliable, maintenance free operation.



Emergency Access

Keeping you moving every step of the way

With the Maple platform, you have the reassurance of knowing that you can securely access your vehicles load area whenever you need to.

A common issue with traditional slamlocks is the risk of locking keys inside the vehicle. For multi-drop drivers and final mile delivery operations this can be particularly problematic, causing disruption to schedules, frustrated customers and costly vehicle downtime.

BondLock solves these challenges with Maple's access control platform. Should keys be lost or locked inside, simply log into the Maple Web Portal, generate a secure access code, tap it into the vehicle, and retrieve your keys instantly.

Security intact. Schedules on track. No repairs, no downtime, no unhappy customers.
