

# Replock & OE Lock Protector

## Enhanced Protection for Vulnerable Drivers Door Cylinders

There has been a sharp increase in the number of Ford vans being broken into in recent months. Thieves have identified a vulnerability within the manufacturer's drivers door locking cylinder, which enables them to bypass the central door locking system, unlocking all doors in the process.

Employing new techniques, thieves are able to manipulate the drivers door cylinder without any specialist tools, in most cases all that is required is a screwdriver to pick the cylinder to directly attack the barrel and release the locking mechanism. Alternatively thieves pierce the bodywork around the drivers door locking barrel before gripping and forcing the lock round until the door unlocks.

The Maple Replock range is a replacement anti-drill and anti-pick cylinder designed to replace the vulnerable cylinder to protect your vehicles against this rising threat.

## Direct Replacement Anti-Pick Cylinder

Replock is a direct replacement, high security anti-pick cylinder that prevents thieves from picking the driver's door cylinder in order to gain access to the vehicle.

Our unique, direct replacement high security door lock replaces the vulnerable OE Lock on the driver's door and combats common attacks employed by criminals to defeat the standard mechanism.

Thieves have also devised a method to manipulate the lock without even having to pick the cylinder. They simply pierce the bodywork around the barrel in several places then grip the cylinder with a pair of mulgrips, and force the OE lock round until the door unlocks. The Ford range or Replock's are supplied with an enhanced lock protector to repel any attempts to grip the cylinder and force the door release mechanism.

## Key Features

- Direct replacement cylinder for the vulnerable OE lock
- High security, anti drill & anti pick, maintenance free cylinder
- Instant protection from lock pick tools
- Patented Ford OE Lock Protector prevents gripping of cylinder (Transit & Transit Connect only)
- Supplied with unique keys
