

# A Robust, High Security Slamlock For Commercial Vehicles

Simple, effective, secure

SlamSecure is a heavy duty, mechanical truck and trailer slamlock designed to remove the vulnerabilities and weaknesses associated with conventional commercial vehicle doors.

Compatible with traditional 'throw over' style handles found on roller shutter and barn/swing doors, SlamSecure is mounted on the exterior of the vehicle, providing both a robust physical level of security and highly visual deterrent to potential thieves. Constructed from corrosion resistant stainless steel, SlamSecure is designed to offer a robust, reliable and user friendly solution that provides operators with an enhanced level of security.

# SlamSecure

## Product Information

---

Manufactured to withstand common methods of attack, in the harshest of environments anywhere in the world, Slamsecure is a cost effective security solution for the road transport industry.

Slamsecure is a heavy-duty, externally mounted locking device, designed with vehicle operators in mind. As a self contained unit without any loose parts or padlocks to administer, doors are simply closed as normal with the handle lowered into position, the mechanical jaws of Slamsecure then clamp it into place, securing both doors and load area in one movement.

As standard, access is gained with the use of a mechanical KABA 20 key, for operations where an even greater level of security is required, upgrade to Maple Fleet Services' IQ application for full access control and audit capabilities.

## Features

---

- Fits to shutter & Barn/swing door applications
- Slamlock Action: Doors are locked as soon as the door handle is securely engaged
- High visibility design acts as a strong deterrent to thieves.
- Compatible with Whiting, Bloxwich, Henderson & Todco door handles
- Short travel handle for ease of operation
- Hard wearing, robust design ensures seamless operation in the harshest operating environments
- Low level of maintenance required
- Equipment can be installed and operational in just 1 hour
- Operated via KABA series 20 key system with over one million keying combinations
- Can be upgraded to Maple Fleet Services' IQ electronic RFID system, featuring full access control & audit capabilities

## Key Points

---

The theft of high value, high risk products moving in supply chains across Europe costs businesses more than €8.2 billion every year.

The average cost per incident of commercial vehicle crime to an operator in the UK is more than £25,000.

Maple Fleet Services have been providing industry leading security solutions since 1974, we are the trusted name in commercial vehicle security.
