| Securing your van & protecting your business

Innovative van security solutions, designed
to combat modern theft techniques

A close-up photograph of a BondLock van locking mechanism. The device is a black, rectangular metal component with several silver-colored screws. It is mounted on a metal frame, likely part of a van's door or side panel. The background is dark and out of focus, showing other parts of the vehicle's interior or exterior structure.

| Redefining Van Security

BondLock is Maple's innovative, high-security van locking system—designed and engineered to deliver maximum protection against both physical attack and keyless theft techniques that bypass manufacturers security.

Van owners and fleet operators are facing unprecedented levels of crime. Today's career criminal has access to an arsenal of different weapons and tools that can be used to bypass manufacturers central locking and security.

With so many different theft techniques to guard against, protecting your vehicle can be a real challenge. BondLock is the solution.

Its unique, patented design has been extensively tested under attack conditions, ensuring it meets the demands of today's van operators.

BondLock – Securing Your Van. Protecting Your Business.

Key Features

BondLock is engineered to tackle the real-world challenges faced by van operators, combining robust security with a wide range of fleet management advantages.

PREMIUM SLAMLOCK

Innovative, high security, automatic setting lock that elevates the security of your van, delivering total peace of mind.

2 TONNE TENSILE STRENGTH

Patented lock mechanism withstands tensile load exceeding 2 tonnes, delivering unparalleled durability and protection.

COMBATS MODERN THEFT TECHNIQUES

Engineered to resist today's most common methods of attack and proven to endure prolonged assault under attack test conditions.

INDEPENDENT CONTROL

Operated independently from the manufacturers central locking using RFID transponders. Lost fobs can be quickly replaced with the originals decommissioned to maintain security.

COMPATABILITY

Suitable for use on side sliding doors, barndors and tailgate applications.

INTERNAL RELEASE

Discreet, internal release mechanism enables exit from inside the load area.

INTERNAL MOUNTING

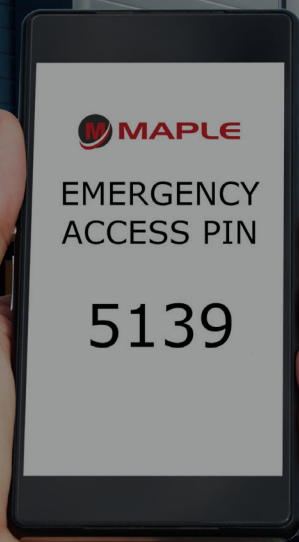

Securely mounted inside the load area to provide maximum protection from attack and tampering.

LOW MAINTENANCE

Features a self-adjusting lock mechanism to compensate for door movement, providing a lifetime of reliable, maintenance free operation.

Emergency Access

Keeping you moving every step of the way

With the Maple platform, you have the reassurance of knowing that you can securely access your vehicles load area whenever you need to.

A common issue with traditional slamlocks is the risk of locking keys inside the vehicle. For multi-drop drivers and final mile delivery operations this can be particularly problematic, causing disruption to schedules, frustrated customers and costly vehicle downtime.

BondLock solves these challenges with Maple's access control platform. Should keys

be lost or locked inside, simply log into the Maple Web Portal, generate a secure access code, tap it into the vehicle, and retrieve your keys instantly.

**Security intact. Schedules on track.
No repairs, no downtime, no unhappy
customers.**
